SUMMARY REPORT
FT 950-E

OCTOBER 1962

FOR RELEASE
December 19, 1962

EXPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States exports of domestic and foreign merchandise, including Special Category commodities and unadjusted for seasonal variation, from $1,761.2 million in September to $1,613.7 million in October[1] reflected decreases in exports to all areas except Canada. Changes in the dollar values of exports to all areas during the period were as follows: Western Europe, from $621.0 to $565.8 million; Latin American Republics, from $279.0 to $243.6 million; Canada, from $300.1 to $350.9 million; and "all other countries," from $561.1 to $453.3 million. These totals include data on exports of Special Category commodities which decreased from $157.0 to $134.8 million.

With Special Category commodities excluded, exports of domestic and foreign merchandise fell from $1,604.3 million in September to $1,478.9 million in October. Decreases were reported in exports to sterling area countries, from $337.8 to $267.5 million; O.E.C.D. countries in Europe, from $529.0 to $466.3 million; and Latin American Republics, from $272.3 to $237.9 million. Decreases were reported in exports to all continents except North America.

Exports to Europe dropped from $545.7 million in September to $483.6 million in October reflecting decreases in exports to the United Kingdom, from $110.8 to $89.3 million; Switzerland, from $30.7 to $19.2 million; France, from $46.8 to $37.2 million; West Germany, from $85.3 to $77.9 million; and Spain, from $23.1 to $16.4 million. The decrease in exports to Asia, from $334.6 to $289.2 million, was mainly due to lower levels of exports to individual countries of this continent as follows: Japan, from $110.0 to $95.0 million; Pakistan, from $30.6 to $17.9 million; Republic of the Phillipines, from $23.8 to $19.3 million; and Iran, from $6.9 to $4.4 million. Exports to South America fell from $171.6 to $133.1 million primarily as a result of decreases in exports to Colombia, from $20.1 to $12.1 million; Venezuela, from $40.9 to $33.6 million; Chile, from $17.9 to $12.2 million; Argentina, from $24.1 to $19.1 million; Brazil, from $36.5 to $32.3 million; and Peru, from $15.8 to $12.5 million.

Exports to Africa dropped from $80.3 to $60.2 million. This change was largely accounted for by decreases in exports to the United Arab Republic (Egypt), from $13.9 to $6.2 million; Republic of South Africa, from $19.9 to $14.5 million; Liberia, from $5.5 to $2.7 million; and Libya, from $5.8 to $3.2 million. During the period, exports to Australia and Oceania fell from $52.3 to $36.6 million owing chiefly to a drop in exports to Australia, from $45.5 to $30.9 million.

Exports to North America climbed from $419.8 million in September to $476.3 million in October mainly due to a substantial increase in exports to Canada, from $290.6 to $341.8 million and to a lesser increase in exports to Mexico, from $62.9 to $71.8 million.

[1]See the October 1962 issue of Report No. FT 900-E for seasonally-adjusted figures on total exports, excluding Military Assistance Program—Grant-Aid shipments. Seasonally-adjusted data are not available for total exports including Military Assistance Program—Grant-Aid shipments or by country of destination.

EXPLANATION OF STATISTICS

COVERAGE: Export statistics include government as well as nongovernment shipments to foreign countries. The export statistics, therefore, include Department of Defense Military Assistance Program—Grant-Aid shipments (for which separate figures are shown in the footnotes of this report), Mutual Security Program economic assistance shipments, and shipments of agricultural commodities under P.L. 480 (The Trade Development and Assistance Act of 1954, as amended) and related laws. (The separate information which is available on exports under P.L. 480 and related laws may be obtained from the Economic Research Service and the Foreign Agricultural Service of the Department of Agriculture.) Shipments to United States armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Puerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as part of the United States export trade. Merchandise shipped in transit through the United States between foreign countries, not entered as imports, is not included in export statistics.

COUNTRY DEFINITION: Although the country of destination is defined as the country of ultimate destination or the country where the goods are to be consumed, or further processed or manufactured, the statistics do not always reflect this definition, as the shipper may not know the ultimate destination of the shipment. In such cases, the shipments are credited to the last country, as known to the exporter at the time of shipment from the United States, to which the goods are to be shipped in their present form. It follows, therefore, that the statistics will tend to be overcounted for shipments to transshipment or merchanting countries and undercounted for other countries. As explained in the footnotes to the table, exports of Special Category commodities are not included in any of the published country totals, for reasons of security.

VALUATION: The valuation definition used in the export statistics is the value at the seaport, border point, or airport of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. None of the values have been adjusted for changes in price level.

RELIABILITY: The statistics presented in this report are based partly on sample data and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all export documents. For the figures shown in this report, the sampling variability can be ignored since the probable variability due to sampling is either less than $50,000 (the largest variation from rounding of figures) or less than a trivial percentage of the individual totals shown.

In addition to the effects of sampling variation and the difficulties described above under COUNTRY DEFINITION, the data in this report are subject to errors from such sources as the carry-over of data from month to month, errors in reporting or processing, the estimation of shipments valued under $100, and the omission of parcel post shipments valued under $50. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of export data is contained in the foreword of Reports No. FT 410 and FT 420. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

[2]Country detail is not reported in the export statistics for Special Category commodities for security reasons. For certain areas, export totals include Special Categories, as shown at the beginning of the table. Export figures for other areas and countries represent total exports less exports of Special Category commodities. See the January 1961 issue of Report No. FT 410 for a list of Special Category commodities. [8]As explained in the April 1958 issue of Foreign Trade Statistics Notes, this is an arbitrary category established with April 1958 statistics to cover certain shipments to unidentified countries in Western Europe. [9]Country designation established effective January 1962. Formerly United Arab Republic (Syria Region). [10]Effective with the statistics for July 1962, the country designation "Portuguese Asia, n.e.c.," comprising Goa, Damao, Diu and Portuguese Timor became obsolete. Beginning with the September 1962 issue of this report, data for Goa, Damao and Diu are shown separately while data for Portuguese Timor are included along with data for other countries in the figures for "Southern and Southeastern Asia, n.e.c." Revisions correcting the July and August 1962 statistics for the individual countries involved, will apear in the December 1962 errata. [11]Country designation established effective January 1962.
